

Technical drawings of the MADA HKA 1000 machine. The front view (left) shows a person silhouette for scale, with overall height dimensions of 73.4" and 55". Machine dimensions include a 15.7" width, a 11.0" height to the center of the blade, a 12.6" angle, and a 64.0" total height. A note indicates a "Blade Change Position: 7.9" minimum". The side view (right) shows the machine's profile with a "Pass Line" dimension of 30.3" from the base to the center of the blade.
