**AMADA**  
Amada Machine Tools America, Inc.  
GRINDING, TURNING AND SAWING TECHNOLOGY

**TECHNICAL CENTER**  
IN SCHAUMBURG, IL

## Why is the Technical Center necessary ?

The key purpose for the AMTA Technical Center is to create a unique atmosphere for all visitors to the very highest standard, where the latest manufacturing technology may be discussed and demonstrated. Amada's policy is to build long term partnerships on the basis of comprehensive consultation and support to the benefit of its customers' profitable future.

## Why is the Technical Center unique ?

The latest technology in each product group can be shown here "live". Customers' requests and manufacturing requirements can be better analyzed in order to find optimum solutions. The philosophy of the Technical Center shows the Amada group and its high esteem to their customers and society.

## What are the functions of the Technical Center ?

At the new Technical Center, an array of machines, peripheral equipment, tooling & software serve as much more than mere exhibits. They are teaching tools, providing total solutions for a wide range of manufacturing challenges. The Technical Center will showcase the latest advances in automation, grinding, sawing solutions and much more – all resulting from Amada's global position as a single-source provider for the manufacturing industry.

## Why is the Technical Center useful for you ?

The Technical Center is a 40,000 sq. ft. facility set on 2 acres – a stunningly designed example of Amada's commitment to redefine performance and reliability while giving you a voice in the process. This high-tech, global-class center will become:

- Your resource for research and technical training
- Your access to innovation and advanced engineering
- Your venue for gaining insight into the latest technologies
- Your opportunity to see those technologies at work in real time

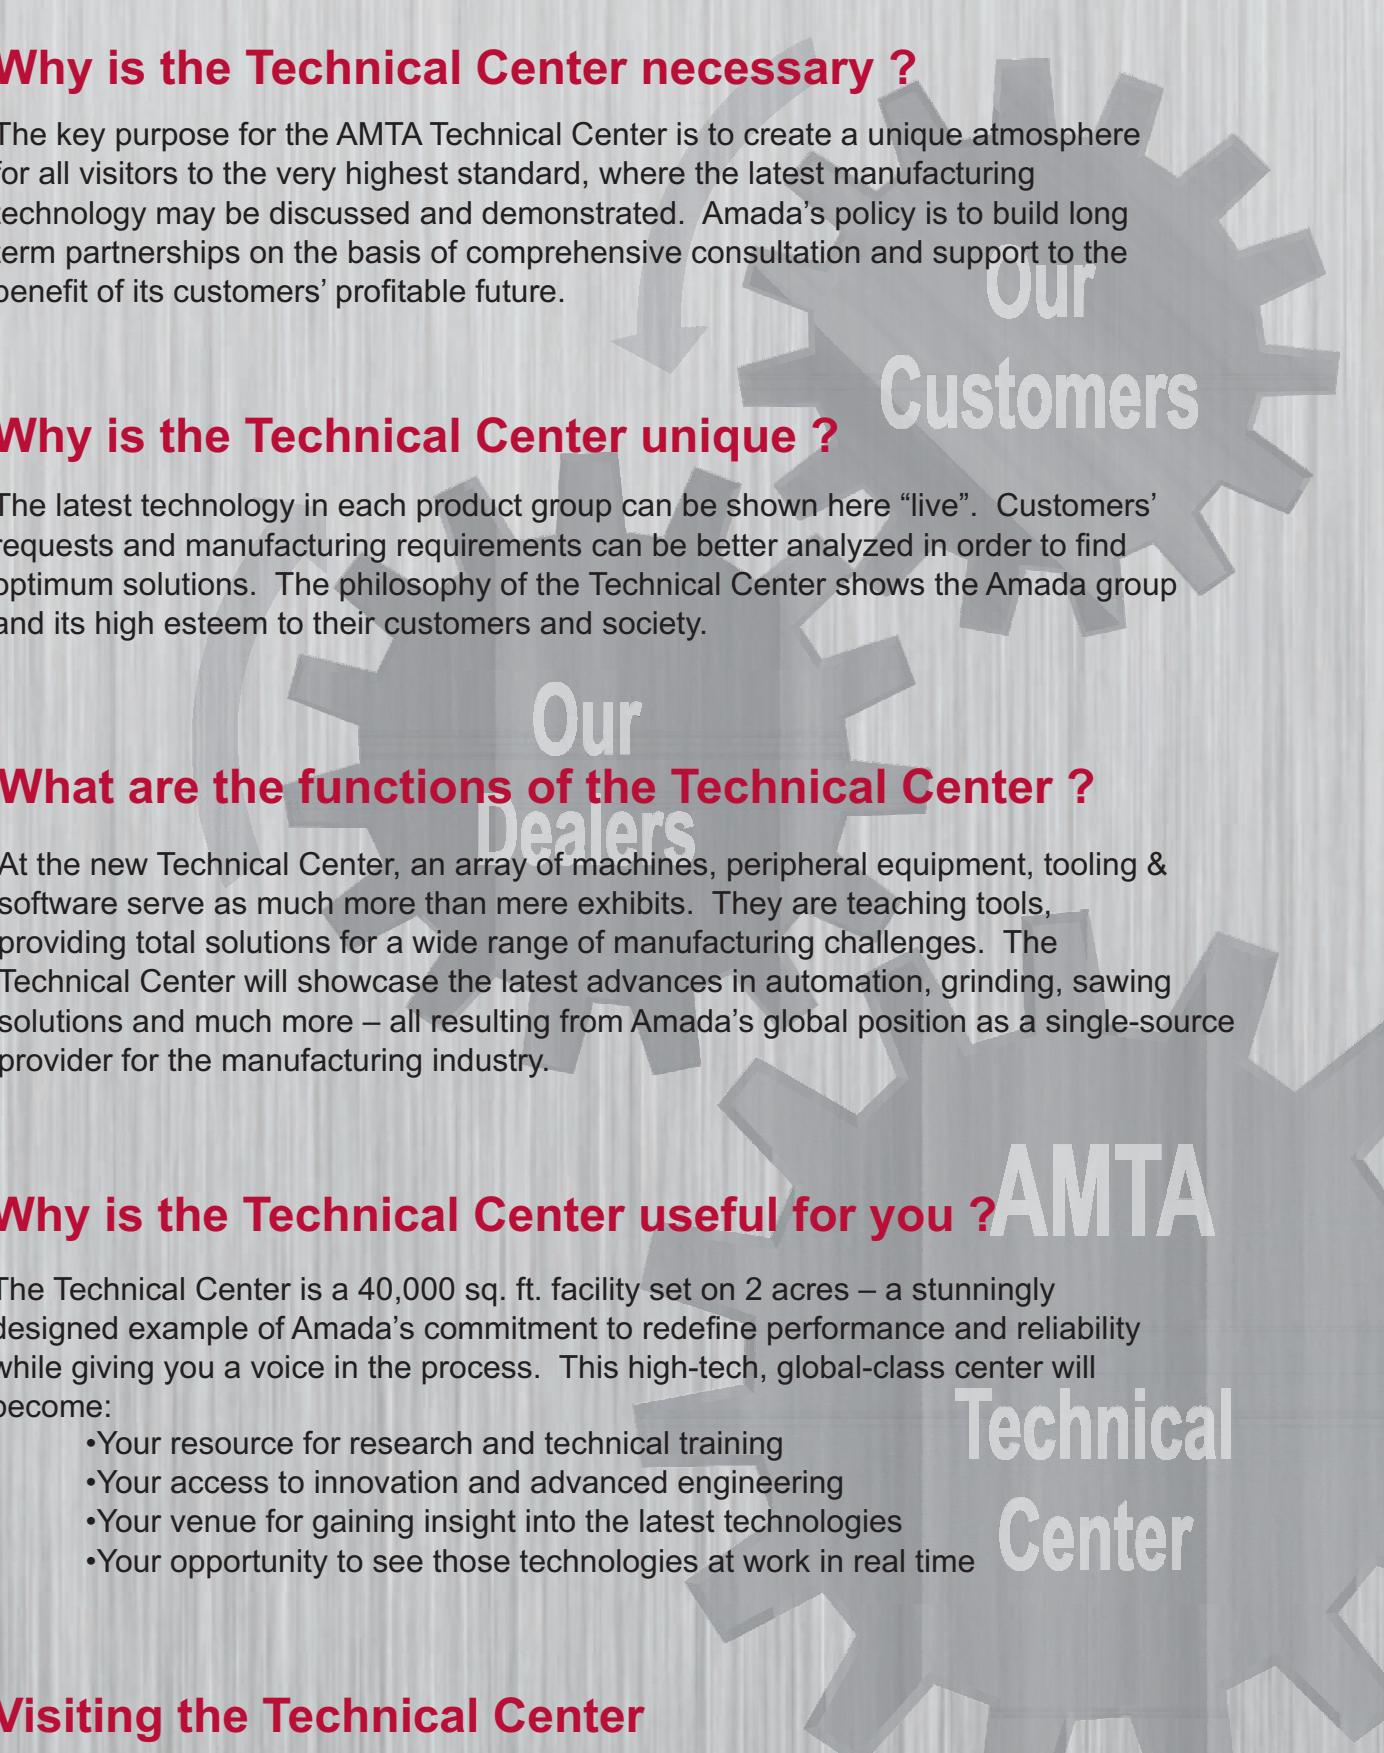

## Visiting the Technical Center

Utilization of the Technical Center by our customers and distributors to see a test cut or live demo, or participate in seminars, is encouraged. We will be hosting monthly special events to demonstrate new products and innovations, and encourage anyone who would like to attend.

## Manufacturing Verification Center

The new Amada Technical Center features a Manufacturing Verification Center, which provides for the ongoing development of the new manufacturing methods and the exploration of advanced technical trends.

Verification Room

Band Saw

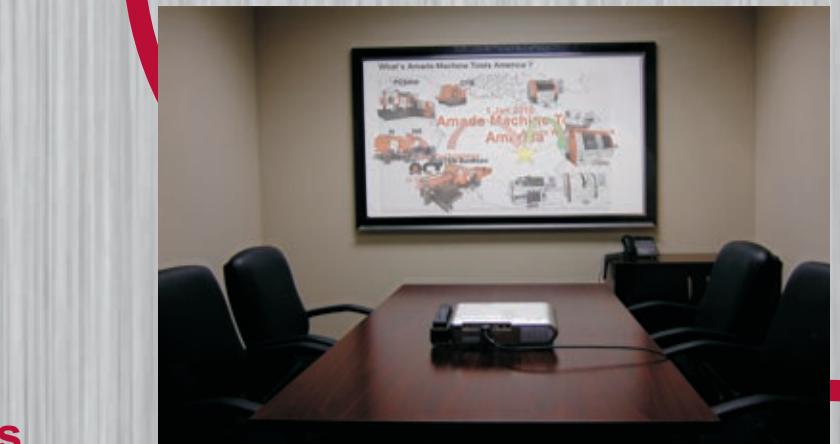

Blade Technical Corner

Grinding

Turning

P&P Rooms

Designed to individualize Presentations & Proposals, the P&P rooms offer an ideal setting for video presentations and computer-generated factory simulations – each used to address specific customer needs and determine optimal customer solutions.

The Training Room, which is featured at the new Technical Center is a state-of-the-art multimedia room, where product presentations and training courses for groups up to 35 persons are accommodated.

Training Room

## Turn-Key Room

Another key component of the new Technical Center is the Turn-Key Room, which is dedicated to the complete testing of customized systems prior to delivery and installation. Every effort is made to ensure customer satisfaction, while providing the quickest return on investment.
